

A photograph of an elderly woman with short grey hair sitting in a wheelchair, wearing a light pink cardigan over a pink top and dark trousers. A younger woman with long brown hair, wearing a white lace top, is pushing the wheelchair from behind. They are on a paved path in a park-like setting with green trees and bushes in the background. The scene is bathed in warm, golden light, suggesting late afternoon or early morning. There are decorative white dotted lines and circles in the upper right area of the image.

Mobility Outcomes via Information Technologies

MOvIT+

*Are you an assistive
technology user
or a caregiver?*

Discover the **MOvIT+**™ Program

To offer the best remote support to assistive technology users and their caregivers

MOViT+™ facilitates a safe and satisfactory use of various types of assistive technologies.

Learn the best practices surrounding the use of your assistive technology!

The MOViT+™ program offers a remote follow-up and coaching interventions for individuals who have received an assistive technology and their caregivers.

Take advantage of our online ressources!

On its website, the MOViT+™ team has identified several resources to facilitate the use of assistive technologies : educational videos, fact sheets, specialized sites, and more.

Identify the problems associated with the use of your assistive technology!

A remote and automated follow-up helps users and their caregivers to identify the potential problems associated with the use of an assistive technology. They can also learn the best ways to use the new assistive technology.

For more information : www.movitplus.com

The MOViT+™ program is currently in a pilot phase. Only assistive technology users and caregivers associated with the clinical teams of the CIUSSS du Centre-Sud-de-l'Île-de-Montréal, the CIUSSS du Centre- Ouest-de-l'Île-de- Montréal, the CIUSSS de la Capitale-Nationale, the Centre hospitalier universitaire de Sherbrooke and the CISSS de Laval can take part in the program.
