About

The MOvIT+™ program offers to assistive technology users and their caregivers a whole set of resources and services. MOvIT+™ facilitates a safe and satisfactory use of various types of assistive technologies (e.g. manual wheelchair, power wheelchair, wheeled base, four-wheel scooter and three-wheel scooter, rollator walker, walker and cane).

Once registered to MOvIT+™, you will be able to:

- Access to a website with useful information and resources, facilitating your use of assistive technologies;
- Get remote follow-up and coaching interventions following the reception of a new assistive technology;
- Identify the potential problems associated with the use of an assistive technology and learn the best ways to use it;
- Get advice from your rehabilitation center clinicians, according to your needs.

The MOvIT+™ program is currently in a pilot phase. Only assistive technology users and caregivers associated with the clinical teams of the CIUSSS du Centre-Sud-de-l'Île-de-Montréal, the CIUSSS du Centre-Ouest-de-l'Île-de-Montréal, the CIUSSS de la Capitale-Nationale, the Centre hospitalier universitaire de Sherbrooke and the CISSS de Laval can take part in the program.

How it works

How does the MOvIT+™ automated follow-up work?

Once you are registered to the program:

- Practical exercises and advice on how to adequately use the assistive technology will be sent to you;
- The MOvIT+™ automated system will ensure two follow-ups by e-mail, text message or phone: one month and three months after you receive your new assistive technology;
- You will be asked to complete follow-up questionnaires (using a computer, a tablet or a phone);
- Depending on the problems identified by questionnaires, MOvIT+™ will send you a list of resources tailored to your needs;
- A clinician may contact you to give you additional advice if needed.

Resources

Use our website to easily find information and advice on how to use your assistive technology!

On its website (movitplus.com), the MOvIT+™ program team has identified several resources to facilitate the use of assistive technologies: educational videos, fact sheets, specialized sites, and more.

These resources are available whether or not you are registered to the program: discover them now!
